

# WEB PHISHING DETECTION

**Team id: PNT2022TMID37270**

**Project name: Web Phishing detection**

## Project Flow

**Find below the project flow to be followed while developing the project.**

- Download the dataset.
- Pre-process or clean the data.
- Analyse the pre-processed data.
- Train the machine with pre-processed data using an appropriate machine learning algorithm.
- Save the model and its dependencies.
- Build a Web application using a flask that integrates with the model built.
